

Fully Automatic Coffee Machines

About us

Since 1919 we have been manufacturing and exporting professional coffee machines all over the world through a well-established network of distributors.

Carimali is one of the very few companies that is able to offer a complete range of traditional and fully automatic coffee machines.

Tradition, reliability, state-of-the-art technology, dynamism and high quality standards are the main values that represent our company.

Besides ISO 9001, Carimali has been recently listed by two major certifications: ISO 14001, environmental management standard, and SA 8000, corporate social responsibility.

We are also members of the major industry organizations dedicated to coffee world: Assofoodtec, HKI and SCAA.

One Company, two product lines

The Carimali line stands out for continued innovation within tradition and history; the Macco line identifies customised products that cater for the most sophisticated customer's needs.

The two product lines share the same technology, while offering different designs.

Through more than 90 years' experience and know-how we contribute to the worldwide development of Italian coffee culture, respecting the traditions of each single market where our products are distributed.

Passion for innovation and dedication to customers makes our company a market leader in the coffee machines industry: you can enjoy an authentic Italian espresso or cappuccino made by a Carimali or Macco machine at any hour of the day in any corner of the world!

Our technologies

Our machines are designed and manufactured by a qualified and highly skilled team: every day, Carimali staff are dedicated to keep up innovative performances and top quality standards.

A key-role is played by our major investments in R&D, that allow us to launch brand new products at a very fast rate and always offer new solutions to our customers.

Barista Steam Wand:

steam wand with temperature probe to heat and froth milk automatically at the desired temperature, ideal for two-step machines

CoffeeCreator:

useful tool to be installed on any computer to set the parameters of our new generation super automatic machines directly from the computer

CupSense:

detect the presence of small or big cups and dispense the right drink accordingly (i.e. small cup for espresso and big cup for cappuccino)

FridgePlus:

detect over temperatures of milk and consequently stop milk-based drinks; detect empty milk cartons and stop milk-based drinks

Loudspeaker:

useful speaker that allows the user to customise the machine using sounds: play music, promotions and any information via usb connection

MaxSave:

patented technology to maximise energy saving, guarantee high production capacity and reduce power consumption

MTT Milk Tuning Technology:

dispense milk-based drinks at the desired temperature; dispense cold milk and chilled beverages; store the fridge under the counter

PowerCleaner:

assure maximum hygiene conditions of the complete milk circuit and steam boiler through an integrated rinsing system

TFT 5.7" Graphic Display:

drink selection icons, images and commercials can be easily customised; online assistance and clear graphic user instructions

USB Connection:

copy and load machine parameters and settings, customise user interface graphics

We recommend to use water softeners to reduce hardness in water that can cause mineral build-up in equipment.

Milk Frother Cleaner

- Breaks down milk buildup
- Cleans steam wands and pitchers

Cleaning Tablets

- Cleaning detergent tablets
- 120 tablets per jar

The Manufacturer reserves the right to modify the equipment presented in this publication without notice.
